Cascais / Lisbon

01 - Diagnostics

Diagnostics of your motorcycle

An objective assessment of technical condition — before a purchase, before the season or when locating a fault. You get an accurate picture of the motorcycle's condition and a prioritised work plan.

Pre-purchase inspection	**150 EUR**
Full technical inspection of the motorcycle before the deal - Fixed price - 10-point inspection - Written report	
Fault diagnostics	**50–350 EUR**
Locating a specific fault — electrics, engine, running gear - Depends on case complexity - Electrics, engine, running gear - We find the cause, not the symptom	
Pre-season check	**from 100 EUR**
Preparation for use after storage, clearance for long trips - Preparation for use - Clearance for long trips - See Section 06	

Diagnostics is an investment, not an expense. An hour of an engineer's work pinpoints the cause of a fault and assesses the remaining life of key components — before they require major repair. You receive a structured list of recommendations by priority: critical work, advisable work and items that can wait until the next service.

02 - Scheduled maintenance

Scheduled maintenance

Scheduled servicing to manufacturer standards. Four main brand groups — the price depends on the model and the service interval.

Consumables included	The scheduled-service price includes all necessary consumables and applicable taxes — oils, oil filters and related consumables: you pay a single amount for fully completed servicing. The only exception is the air-filter replacement on Indian, BMW, Moto Guzzi, Ducati, Japan, KTM, Triumph and Royal Enfield models: the filter itself is charged separately (marked in the lists below).

HARLEY-DAVIDSON	**300 EUR**

- Visual inspection - Engine check - Brake system - Suspension - Electrical system - Lighting - Tyres - Wheel bearings - Belt tension - General re-torque - Engine oil change - Gearbox oil change - Clutch oil change - Oil filter change - Air filter clean & oil - Battery check - List of recommendations	

INDIAN	**200 EUR**
- Visual inspection - Engine check - Brake system - Suspension - Electrical system - Lighting - Tyres - Wheel bearings - Belt tension - General re-torque - Engine oil change - Oil filter change - Air filter replacement (filter not included) - Battery check - List of recommendations	

BMW · MOTO GUZZI	**from 180 EUR**
- Visual inspection - Engine check - Brake system - Suspension - Electrical system - Lighting - Tyres - Wheel bearings - Final-drive check - General re-torque - Engine oil change - Gearbox oil change - Final-drive oil change - Oil filter change - Air filter replacement (filter not included) - Battery check - List of recommendations	

DUCATI · JAPAN · KTM · TRIUMPH · ROYAL ENFIELD	**from 150 EUR**

- Visual inspection - Engine check - Brake system - Suspension - Electrical system - Lighting - Tyres - Wheel bearings - Chain tension - General re-torque - Engine oil change - Oil filter change - Air filter replacement (filter not included) - Battery check - List of recommendations	

Brand-specific services

Harley-Davidson major service (25,000 km)	**from 400 EUR**
Scheduled service plus brake fluid and the platform-specific items	
BMW Inspection 2	**from 350 EUR**
Scope depends on the model; confirmed in a written estimate	
BMW R 1250 GS / GSA — valve-interval service	**450–650 EUR**
All fluids, valve-clearance check and throttle-body synchronisation included	
Ducati full Desmo service	**750–1 500+ EUR**
Per model — from an older Monster to a Panigale V4 with full inspection	

The "from" price for BMW, Moto Guzzi, Ducati, Japanese brands, KTM-group, Triumph and Royal Enfield machines is a starting price — the exact amount depends on the model and is confirmed in a written estimate before work begins. Valve adjustment and carburettor service are not part of scheduled maintenance — see Sections 03 and 04.

03 - Brakes · Carbs

Brakes, consumables and carburettors

Replacement of fluids, regular consumable operations and fine work on the fuel system. Prices are for labour; parts and fluids are not included unless stated otherwise.

Brake system

Brake fluid · non-ABS	**100 EUR**
Brake fluid · ABS	**from 150 EUR**

Regular consumable work

Air filter clean & oil **Servicing of free-flow / OEM filter**	**45 EUR**

Air filter replacement Price depends on model and filter type	from 20 EUR
Fork seal & dust-seal replacement Includes fork strip-down and oil change	from 150 EUR
Battery replacement Removal, fitting, charging-circuit check	from 20 EUR

Carburettor service

1 carburettor	from 75 EUR
2 carburettors	from 150 EUR
4 carburettors	from 200 EUR

04 - Valves · Wheels

Valves, wheels and chain

Valve-train adjustment, tyre fitting by motorcycle class and complete chain-drive care.

Valve adjustment

Engine type	Clearance check only	Check + adjustment
BMW Boxer	150+	300+
Japanese Inline 2 / 4	250+ / 400+	300+ / 650+
Triumph / Royal Enfield twin	250+	300+
KTM / Japanese	350–450+	550–750+
Moto Guzzi / Vintage	100+	150+
Ducati Desmo	550+	1200+

Prices in euro, «+» = starting price: the final figure depends on the model, the engine's condition and access to the valve train, and goes into the written estimate first. Ducati Desmo — the desmodromic mechanism requires separate expertise, so Desmo service is significantly more expensive than a standard adjustment.

Tyre fitting · labour price

Operation	Street / Sport / Naked	Chopper / Touring	Custom
Front wheel	40+	80+	100+
Rear wheel	60+	100+	100+
Front + rear set	90+	150+	200+
Puncture repair	40+	40+	40+

All prices in euro.

Tubeless conversion of spoked wheels	**€100 per wheel**
Chain clean, lube & adjust	**40 EUR**
Complete chain-drive care — extends chain and sprocket life	

The chain rewards regularity. Timely care noticeably extends the life of the chain and sprockets — one of the cheapest preventive jobs in the price list. A neglected chain-and-sprocket set costs many times more.

05 - Accessories & Tuning

Accessories and tuning

Fitting of accessories, electrical equipment and tuning components. Prices are for fitting labour; the components themselves are quoted separately. A "+" mark means "from the stated amount".

Accessories	Crash bars - 50+ EUR Luggage systems - 50+ EUR Hard cases - 100+ EUR Hand guards - 50+ EUR Engine guard - 50+ EUR
Electrical equipment	USB socket - 100+ EUR Auxiliary lights - 150+ EUR Indicators - 150+ EUR Brake light - 100+ EUR Heated grips - 100+ EUR Bluetooth / audio - 100+ EUR Navigation - 150+ EUR
Tuning	Exhaust - 100+ EUR Air cleaner / intake - 100+ EUR Fuel tuner - 150+ EUR Handlebar - 100+ EUR Risers - 100+ EUR Foot pegs - 100+ EUR Forward controls - 100+ EUR Brake lines - 150+ EUR Performance parts - 100+ EUR

Fitting is half the result. Auxiliary lights, a fuel tuner or performance components only deliver with correct installation and setup. We select components for your model, agree the estimate and fit to torque spec.

Component sourcing. OEM, aftermarket and tuning parts from major international catalogues. One contact for both service and parts: no need to source parts yourself.

06 - Seasonal prep

Seasonal preparation and other work

Preparing the motorcycle for a new season or a long trip, hourly and non-standard work. Inspection of key systems before use.

Season / trip preparation	**from 100 EUR**
Comprehensive technical inspection before departure	

Other work	50 EUR /hour
Work not listed — hourly rate	

Transparent timelines and pricing. We state a realistic timeframe and final amount in advance. If additional work is found during the job, we agree it with you separately before continuing. No surprise bills at handover.

07 - Stage 1

Stage 1 — individual ECU file

An individual DCF-Performance ECU file for your motorcycle, your setup and your goals — at a fixed price. Included: coverage check, computer diagnostics before and after, visual inspection, ECU read, original software kept in our archive, the individual file and the write. Scope, steps and terms are on the Stage 1 page.

Stage 1 — all makes except Chinese brands	800 EUR
Individual DCF-Performance ECU file, VAT included	

Stage 1 — Chinese brands	650 EUR
CFMoto, Voge, Benelli, Zontes and others: individual price, VAT included	

Additional options	on request
Thermal Control, Neutral RPM, Max RPM, Exhaust Flaps, track options, A2 restriction removal: listed on the Stage 1 page	

Stage 1 is a fixed price and does not depend on how the ECU is read. The motorcycle must be technically ready for Stage 1: we need a motorcycle in good working order. A High Flow air filter and an exhaust system are not included.

08 - Customizing & community

Customizing and community

Bespoke motorcycle builds and a space where a community forms around the workshop.

From concept to championship build	Full bespoke motorcycle builds — from concept and technical brief to final assembly and entry into international championships. The same engineering approach that earned ICM the AMD World Champions title, the world speed record at Bonneville and the win at the BMW Motorrad Customizing Championship. We take on the jobs other workshops turn down: tangled wiring, fabrication of non-standard parts, non-standard component fitment, restoration from lost specifications. Custom-project pricing is calculated individually after discussing the concept and technical requirements.
Lounge area in the workshop	Our space displays championship motorcycles and memorabilia — Beckman, Inspirium, Unbreakable and projects shown at the world's biggest exhibitions. Not a museum behind glass, but a living part of the workshop.
Drop in just for coffee	You can drop by without bringing a bike for repair. Coffee, talking machines, discussing projects and routes — it's all part of the ICM atmosphere. Doors open Tuesday to Saturday, 10:00–18:00.

Riders' community	A community of riders for whom machines are a way of life is forming around the workshop. Group rides, meetups, sharing experience and supporting local motorcycle culture in Greater Lisbon.

Fix your ride & fuel your soul. This slogan captures what we do: we restore the motorcycle to the technical condition it was designed for — and with it, the very feeling of riding you chose it for.

About these prices

All prices are in euro and include applicable taxes and fees. Prices are indicative: the final amount is determined after diagnostics and depends on the make, model, technical condition of the motorcycle and the actual scope of work. The scheduled-service price includes all necessary consumables, except the air-filter replacement on Indian, BMW, Moto Guzzi, Ducati, Japan, KTM, Triumph and Royal Enfield models. For other work, the cost of parts and consumables is not included unless stated otherwise. This price list is for information only and does not constitute a binding offer. Valid from 2025 until the next edition.
